

Task 7

The second period is full-term twins. After the birth of the first fetus, a vaginal examination was performed, in which it was found that the second fetus was in a transverse position. The fetal head is located on the right. The fetal heartbeat is clear, rhythmic, 145 beats/min.

1. Interpretation of objective / laboratory data.
2. The formulation of the preliminary diagnosis based on the identification of pathological changes.
3. The appointment of additional examination methods (laboratory or instrumental) to confirm the diagnosis.
4. Definition of the basic principles of treatment (medication or surgical) of this pathology.
